

WHAT is "governance" in the Internet?
HOW to represent netizen on the web?
HOW to internationalize the Internet?
HOW to keep the Internet in private sector?
WHAT to do on future IP address requirement?
WHAT to do on future domain name requirement?
HOW to handle intellectual property?
HOW to harmonize the Internet and E-commerce?
HOW to support multilingual domain names?
HOW critical is "physical infrastructure" the "code" and "content" layer?

WHAT various layer of Internet governance than runs the global networking platform?
HOW democratic and participative is the functioning of the ICANN?
WHAT solution route to minimize controversy of Internet Governance through creation and control of generic top-level domains, the control of country-code domains, ICANN's budget and responsibilities, participation level of individual governments, and role of ITU / UN in Internet Governance?
