

The Great Content Effect

Overview of ICT & Digital Content in 20 Countries

Let's Connect Globally

We are in the 4th series of the World Summit Award in 2009. So far, being the only award concentrating on e-content and creativity across more than 170 countries, WSA has grown bigger, wider, and boasts more than 2,500 best practices across diverse field of activities.

This year is a special moment to bring the grand jury of the WSA to India which is not only one of the biggest hub of human foot prints but also multiple of ethnicity, culture, religion, languages, medium, and geography.

Since WSA is a network of hundreds of ICT & Digital Content experts in hundreds of countries, out of 40 Grand Jurors, that we short list, play a demonstrative face to 7 continents through their countries .

In the next few pages you would get a chance to see the overview of ICT penetration, digital content players, best practices in hundreds, across 20 countries, because that is the only countries we received the chapters from our country experts by the time this magazine was going for print.

Like in the past, we would print soon the country chapters in its third version of the book "e-Content: Voices from the Ground" but till then, we thought we would reach out to you through this magazine as a special issue on the occasion of the Grand Jury of WSA 2009, taking place in India from April 2-8.

For all the mistakes, please send your rants to any of us!

Cheers,

Peter Bruck (bruck@research.at); Osama Manzar (osama@defindia.net)
